

COOLSHIRT SYSTEMS

Used by over 50,000
racecar drivers

"I rely on my COOLSHIRT SYSTEM to keep me cool, comfortable and focused."

Maryeve Dufault
Professional Racecar Driver

PROCOOL R

With multiple safety features and a rugged carbon fiber and aluminum housing, the PROCOOL R system is designed for the most harsh racing environments on earth so that it can keep you cool all the way up to the trophy presentation.

If you want the easiest system with the most cooling power then look no further.

PRO AIR & WATER

Used by drivers in all levels of racing, this system promises the ultimate in driver cooling comfort.

It delivers temperature-controlled cooled water to the driver's COOLSHIRT and cooled blower enhanced HEPA-4 filtered air to the helmet. Twelve feet of double insulated water hose with automatic shutoff/quick disconnects attach the shirt to the unit, and the Dual Temperature Control Switch allows the user to regulate the flow of air and water for personal comfort based on external temperature variation.

COOLSHIRT SYSTEMS

COOLING ENGINES

Club System

CS-1212qt/3+Hours
 CS-2424qt/6+Hours

Rally System

RALLY-2-H-12.....12qt
 RALLY-2-H-24.....24qt

Round System 10 Quart

Small footprint originally designed for spec Ford Racer

MPS Cooling System

Active Cooling for the pit crew

Drag Pack System

Ideal for cramped cockpits and drag racers

COOLSHIRTS

All shirts have patented non-kink tubing for consistent and continual cooling
